

CS 410P/510 – Front End Web Technologies

Final Project Proposal

Final Project Proposal

Create a slideshow with 6-12 slides about the final project. This slideshow should include:

- an explanation of the application you will be building and why you have chosen to build that application
- the features you will be implementing
- the stack (languages, frameworks, charting libraries, etc) you plan to use
- an overview of at least three APIs you researched for this project, including information available, data format, cost, etc
- at least three mockups of workflows within this application or at least three graphs you plan to build using the data

Time: 3-4 minutes (followed by feedback from the instructor)

Submission Guidelines: Please submit a PDF version of a slideshow. If you have a team, your team should have **only one submission**, but make sure you list the names of every team member.

Due Date: Tuesday, July 7 at 11:59pm
